

TMS-2000WRC

THE SCATTER WORKS INC. GRESHAM, OREGON USA

High Speed Wafer Roughness Measurement

Front and Backside Measurements

Revolutionizing Wafer Manufacturing

The fastest, most accurate, laser technology non-contact texture measurement system in the world. The system collects scattered light and segments the scattered light to compare anisotropic and isotropic roughness of the wafer surface. Don't settle for just a piece of the wafer puzzle; get a full wafer scan with a TMS-2000WRC.
